CEO Report

Luis Reyes
Chief Executive Officer

Kit Carson Electric's Board of Trustees and Management are happy to announce that we continue to meet our commitment to our members, continue to provide reliable and affordable electric service, and address the risks and challenges that will face our members now and into the future. With an uncertain and volatile economy and with uncertainty with regulators and legislators with respect to the energy policy we continue to chart a path through our planning processes to ensure we will have the infrastructure and resources to offer reliable electric service in the future, energy efficiency programs, renewable energy resources such as solar and maintenance programs. In 2009, due to the continued economic downturn in our communities, our state and nationally, our members as well as Kit Carson Electric Cooperative (KCEC) has felt the impact of a poor economy on our energy sales and revenues. We have seen members reduce their electric usage because of both necessity and affordability but also our members are becoming more energy efficient and conservative. In 2010 KCEC applied to the NMPRC for a Rate Increase, the first in 25 years. To help mitigate the impact of the increase, KCEC continues to institute best practices for our Cooperative operations, as well as cost cutting measures and cost containment initiatives to ensure we continue to provide the best customer service at the most affordable cost.

Alex Romero
Chief Operating Officer

Our energy efficiency programs have focused on promoting energy efficient products such as water heaters, compact fluorescent light bulbs, Convect air heating, electric thermal storage heating units (ETS) and promoting Time of Use use strategies. We encourage our members to continue to take advantage of our products, services, and of our incentive programs. KCEC allocates over \$10,000 annually, for the purpose of giving rebates to our membership on a majority of our products. The ultimate goal of KCEC energy efficiency programs is to lower our member's electric bill, better utilize energy in a cost effective way and to enhance the quality of life for our members. The Board also allocated \$50,000 to our Members helping Members fund to assist low and fixed income in paying their electric bill during these tough economic times.

KCEC is also committed to continue to promote renewable energy. The renewable energy of choice for KCEC and its members has been solar energy and will continue to be into the future. The goal of our solar energy program is to make solar energy affordable and accessible to every member of the Cooperative. It is our goal and mission to make solar energy "mainstream" and available to all. We have implemented several solar programs such as KCEC owned Solar, PartnerShip Solar (Purchase Power Agreement) and Community Solar. Some of the projects that have been commissioned and that are operating include the 500 kW solar array located at UNM-Taos Klauer campus, the KCEC 100 kW Solar Parking Canopy which is located at the headquarters of KCEC, the 43 kW system located at KTAO, and the Chevron Technology Ventures (CTV), 1,000 kW concentrating photovoltaic solar facility on the tailing site of Chevron's molybdenum mine in Questa, New Mexico. The electricity provided is sold to KCEC through a purchase power agreement. This is the largest CPV installation in the U.S. and one of the largest in the world. Some of the goals of KCEC regarding renewable energy are to enhance Renewable Portfolio Standards (RPS). Our Community Solar Program will build its first community owned array in partnership with Taos Charter Schools, Holy Cross Hospital and the Weimer Foothills Association. This project should be completed during the fall of 2011. Finally our Voluntary Green Power Program continues to be a success. KCEC's Voluntary Green Power Program currently has a total of 1,606 members, which purchased 7.13 million kWh. We encourage our membership to participate in our Green Power Program. Our special thanks to the participants who through their efforts have contributed to the number of green energy sold.

Continued

CEO Report

KCEC continues to focus on our core business and make the necessary infrastructure improvements required for growth and reliable service. KCEC recently completed several large electrical upgrade projects this year. Some of the areas where major upgrades have been completed include Angel Fire, Ranchos De Taos, Ranchitos, Blueberry Hill, El Prado, Ojo Caliente, Ute Park Eagle Nest and Red River. Other smaller projects that were also constructed and completed this year throughout the service area will help reduce outages and increase system reliability. Our tree trimming and maintenance crews have been assigned to different areas within our service territory to aid in the reduction of outages. As a result of our continuing upgrades and maintenance, KCEC has one of the lowest and best outage records in the state of New Mexico.

As far as our Division performance, Kit Carson Telecommunications (KCT) has focused on improving and enhancing its network reliability and availability. KCEC is among rural electric cooperative utilities that were awarded funding under the American Recovery and Reinvestment Act of 2009 to deliver broadband to rural communities. Kit Carson's Fiber-to-Home project was the only rural electric cooperative awarded funds to build a "last mile" network. The KCEC "fiber-to-the home" project will allow greater bandwidth in, providing the quality necessary for applications such as internet, telemedicine, teleconferencing and video sharing for education, business and entertainment. Once completed, the co-op's project will make broadband service available to 29 communities, reaching approximately 20,500 households, 3,600 businesses and 183 community institutions, such as hospitals, schools and other government facilities. Deploying fiber will provide the capacity needed to meet future needs. For example, KCEC's fiber network will be used to enhance "smart grid" technologies, which can include energy monitoring, load control and automated metering systems for future Smart Home implementation. KCEC will use existing right-of-way to build a fiber-to-the-home network capable of at least 100 Mbps for residential customers and 1Gbps broadband service for anchor institutions, such as schools, libraries and other community facilities. Kit Carson's broadband project is an infrastructure investment that will boost economic development by attracting new businesses, jobs, health care services and educational opportunities. KCEC was awarded 63.8 million dollars in stimulus funding (a \$19 million dollar loan and a \$44 million dollar grant; a 70/30 split). The project will be completed within 36 months.

KCT's variety of services to our members such as WildBlue, DSL, and fixed wireless continued to grow in 2010 and we expect that same increased growth in 2011. We have met our goals and mission to bridge the "Digital Divide" and to provide state of the art telecommunication services for our members at affordable prices.

Kit Carson Energy, Inc. (KCEI) continues to deliver propane in a competitive fashion and meet its goals and objectives of offering affordable, competitive, and safe propane services. In 2010, KCP was moved into a for profit subsidiary. In its first year KCEI turned a profit. Since 2000 KCEC has received payments totaling \$2,497,492 from Kit Carson Propane and KCEI. The successful year was a result of team effort by the hard working Board of Directors and employees. Suggestions and new ideas were provided by KCEI employees on how to better streamline the company's activities. KCEI remains committed to the original vision of KCEC in establishing a propane division that is to provide safe, affordable propane and propane services. KCEI has plants in Taos, Questa, Penasco and Ojo Caliente to efficiently serve the membership. KCEI is committed to ensuring that customers receive stable pricing during the winter months when prices are prone to escalate.

We will continue to improve our services and operate a transparent and open Cooperative. We will also continue to communicate important issues to our members and do our part in helping our community in becoming energy independent, support a healthy environment for ourselves, our children and for our future and enhance the quality of life for our members. As always it has been our honor and pleasure to have served our members. Thank You.

Coloring Contest / Youth Tour

2011 Washington, D.C Youth Tour Recipients

Kit Carson Electric Cooperative would like to thank the students who will represent our Cooperative and their schools on the Government in Action Youth Tour in Washington D.C., in June. Every year KCEC sponsors junior high school students from schools whose parents or guardians live in our service area to attend this trip. The students will learn about our government and electric cooperatives, and meet New Mexico's congressional delegation. The recipients submitted a 750 word essay on the following topic; "What does KCEC mean to our communities?" Congratulations to all.

Kit Carson Electric participated in a coloring contest sponsored by New Mexico Member Services Association.

Second, third and fourth grade students compete in this contest. Judges select an overall winner and one winner from each school and each grade level. Selected winners receive a \$25.00 check a t-shirt and a customized plaque. This year we are pleased to announce Kit Carson's overall winner and also the 3rd place Statewide Winner Roah Khweis.

**As always KCEC will continue to make Safety a priority for our children; our future.*

Roah will receive a personalized t-shirt, a customized plaque and \$50.00 courtesy of Kit Carson Electric Cooperative. Roah will also receive an additional \$250.00 from New Mexico Marketing & Member Service Association.

Kit Carson Electric Education Foundation, Inc.

In June 1996 Kit Carson Electric Cooperative consumers voted in favor of a bylaw change that allowed the establishment of a charitable foundation for the purpose of charitable assignment of patronage capital unclaimed after a two-year period. The Foundation was incorporated December 13, 1996. The Kit Carson Electric Cooperative Trustees named a representative from each district in the Cooperative's service area to serve on the Kit Carson Electric Foundation, Inc. as follows:

Mr. Rudy Martinez, President, District 1

Mr. David Arguello, Vice President, District 2

Mr. Steve Archuleta, Secretary/Treasurer, District 3

Mrs. Catherine Garduno, District 4

Ms. Sally Torres, District 5

The fund began with approximately \$180,000.00. Eighty percent (80) of the fund was earmarked for education and up to twenty (20) percent for non-profit organizations. Kit Carson Electric Education Foundation is available to qualified high school students who attend either a public or private school and whose parents are members of the Kit Carson Electric Cooperative service area. Scholarships are granted to qualifying high school students who will be attending a recognized and accredited institution of higher education. Applicants are selected by their levels of good character, academic achievement and can demonstrate a coherent degree plan and willingness to pursue a course of high learning. Over the past 13 years, the Foundation has been proud to help these students achieve their dreams.

Kit Carson Electric is proud to announce that since the inception of the Kit Carson Electric Education Foundation, it has awarded a total of 479 scholarships for a total of \$451,250.00 from 1997 to 2011. The total donations awarded from 1997 through 2011 are 457 donations for a total of \$76,295.95.

Questions & Answers

WHO IS KIT CARSON ELECTRIC COOPERATIVE?

Kit Carson Electric Cooperative is a private nonprofit organization – a rural electric cooperative – owned by its member-consumers. It is incorporated under New Mexico state law and owned by its members. Members are accepted upon application and receipt of electric service. The cooperative is guided by an eleven member Board of Trustees, with each Trustee representing one of the Cooperative's five service districts. Each trustee is elected for a four year term by the members residing in the service district the Trustee represents. It is this grass roots origin and support that fosters the kinds of policies and objectives at Kit Carson Cooperative that help maintain and improve the quality of life in our region.

WHAT ARE CAPITAL CREDITS AND HOW ARE THEY PAID?

Any profit over and above the actual cost of operation in any given year is divided among the consumers of record of that year based on the consumers' kilowatt hour usage. These profits are called Capital Credits, and they are accrued each year to an account set up in each consumer's name. Capital Credits are refunded as a cash payment to the consumer and can only be paid to settle the estate of a deceased person, or when a general retirement is made to all consumers during a given year. General refunds of Capital Credits have been made through the year 1979.

WHERE DOES KIT CARSON GET ITS POWER?

Kit Carson Electric Cooperative buys wholesale electric power from Tri-State Generation and Transmission Association Inc., headquartered in Denver Colorado which is comprised of 12 New Mexico Cooperatives and 32 out of state cooperatives for the purpose of purchasing wholesale electric power at generally lower bulk rates for its members. The New Mexico distribution cooperatives which are members of Tri-State service about 70% of New Mexico's land area and about 800,000 people. Most of the power Tri-State wholesales to its member cooperatives come from the following generating Stations: Craig Station (654 MW), Nuclear Station (100 MW), Escalante Station (250 MW), Laramie River Project (1692 MW), Springer Ville Station (1178 MW), Burlington Station (100 MW), San Juan (41 MW), Rifle Station (85 MW), Pyramid Station (40 MW), Knutson Station (140 MW) and Limon Station (140 MW).

WHAT TO DO WHEN YOUR POWER IS OFF.

If your lights go out, first check lights and appliances in other rooms. If you still have power in some areas, most likely a fuse has blown or a circuit breaker has open. This indicates a warning of overloaded wiring or a defective appliance. If all lights are off, check to see if your neighbors have power. This will help the Cooperative to determine how widespread the outage may be. Telephone the Cooperative and report the outage. The person who takes your call will record your name, address, telephone number and ask directions to your house. When there is a wide spread power outage, Kit Carson Electric Cooperative's telephone lines will be swamped with calls and you will likely get a busy signal. We answer the calls as fast as possible-one after the other. We can only ask that you keep trying. Our emergency numbers are staffed 24 hours a day. Let us know ANYTIME your service is interrupted and we will assist you in checking your power supply. Please keep in mind that if the trouble is on your side and a crew is called out there is a service charge for the call out. Also, please let us know of any other emergency situations you observe, such as damaged or fallen utility poles, damaged lines or insulation, trees on lines, or accidents involving Kit Carson Electric Cooperative's lines or equipment. If you live in the Taos area, telephone 758-2258. If you live out of the Taos area, call toll free 1-800-688-6780. Please use these lines to report outages or emergencies.
