### KCEC's Energy Supplier Acquires Additional Renewable Energy

Kit Carson Electric Cooperative's(KCEC) energy supplier, Guzman Energy, is set to acquire renewable wind energy from Panorama Wind Farm. The new project will generate more renewable energy for KCEC and its members. KCEC is reaching its goal to become 100% renewable and positively impacting the fight towards climate change.

On June 22, 2021 Guzman Energy and Leeward Renewable Energy announced the execution of a Power Purchase Agreement ("PPA") for the 145 MW Panorama Wind Farm in Weld County, Colorado.

The project will be Leeward's third project in Weld County, bringing its total installed capacity in the county to 617 MW, reflecting an aggregate capital investment of over \$850 million. The Panorama Wind Farm is expected to generate enough electricity to power approximately 53,000 homes with clean energy and to deliver significant economic benefits to the county. Additionally, the project will create 185 jobs during peak construction and permanent renewable energy jobs in the community.

Construction of the facility begins in early July and is projected to be completed in December 2021. The Panorama Wind Farm will consist of over 60 wind turbines supplied and commissioned by Vestas-American Wind Technology. Leeward will own and operate the wind farm.
