CEO'S MESSAGE

Kit Carson Will be 100% Daytime Solar by December 2021

TAOS, NM – Kit Carson Electric Cooperative and Torch Clean Energy Secure Financing to Achieve 100% Renewable Energy Goal - Addition of 21 MW of solar capacity and 15MW of storage will help the co-op meet

its goal of 100 percent daytime solar reliance months earlier than planned.

Through an agreement to provide turnkey development services, Torch Clean Energy (Torch) developed two solar storage projects in the KCEC service territory -the Taos Mesa Energy Facility that will deliver 15MW of solar and 12MW of storage capacity and the Angel Fire Energy Facility will deliver 6MW of solar and 3MW of storage capacity.

Through a long-standing financing relationship as Kit Carson's largest private lender, CoBank provided the financing for both projects.

Once constructed, KCEC will surpass the 35 megawatts required to meet its goal of 100 percent daytime solar energy -originally set for the year 2022 -up to nine months earlier than anticipated.

These new developments build upon the arrays that KCEC has installed over the past 12 years, creating a network of distributed energy resources throughout the KCEC service territory. Once complete KCEC will have a total of 53MW of renewable energy, including 41 MW of solar and 15 MW of storage capacity.
