

Planned Power & Internet Outage

Reason:

KCEC replacement of a significant transmission, distribution, and internet fiber pole

Kit Carson Electric Cooperative (KCEC) will be conducting a **PLANNED POWER OUTAGE** on **10/20/2022** and **10/21/2022**, replacing a 69 kV transmission, distribution and internet fiber pole that was damaged during last year's winter squall. KCEC is replacing the current pole with a more robust metal pole in preparation for this upcoming winter.

On Thursday, October 20, 2022, KCEC and contractors will replace the pole's distribution side, affecting 25-30 members on State Rd 240 Culebra Rd. The outage will last approximately eight hours, from 8:00 a.m. to 4:00 p.m.

On Friday, October 21, 2022, KCEC and contractors will replace the transmission and fiber lines, affecting Penasco and surrounding areas. The outage will last approximately four hours, from 10:00 a.m. to 2:00 p.m.

Due to the high danger implications and remote location of the pole, KCEC and contractors need to implement enhanced safety protocols resulting in the two-day outage. KCEC encourages members to prepare for the outages and take proper necessary plans to secure the safety of members and their families.

Thursday, October 20, 2022: ST RD 240 & Culebra Rd Members

Date: Thursday, October 20, 2022
