

(575) 758-4838

IMPORTANT! Before starting with the following instructions, ensure your router is plugged into power and has our Ethernet cable connected to the white "WAN" slot.

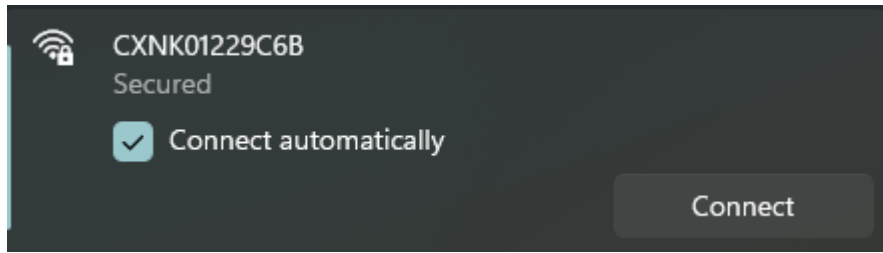

*Please note Ethernet may not be yellow. Typically installation cable will be black unless aftermarket cable is provided.

Getting your Calix router setup

1. Upon ensuring all connections are correct and your Calix device is connected to power, **reach out to Kit Carson Internet IT for initial setup.** The router will not function without this step.

2. On your devices, look for the default Wi-Fi name (**SSID**) and your Wi-Fi password (**WPA Key**). This can be found on the bottom of the router. If you wish to change this, please let the technician know.

3. Once you have contacted the KCI technician, you're all set ! Look for your Wi-Fi information on your devices and connect with either the default information (if you chose to

leave it as is) or your new Wi-Fi information ! If you have any issues, feel free to reach out to the technicians.

4. If you have any mesh points, you may pair those now. The pairing process involves connecting the mesh unit to the main router via Ethernet. They will begin the syncing process. After this first time setup, you may place the mesh point anywhere in your household.

Things to note regarding the mesh:

- * For the best results, place them at a halfway point where you have poor signal.
- * The routers can only support a maximum of 4 mesh satellites.
- * The mesh units are only designed for indoor use. They are not for outdoor placement.

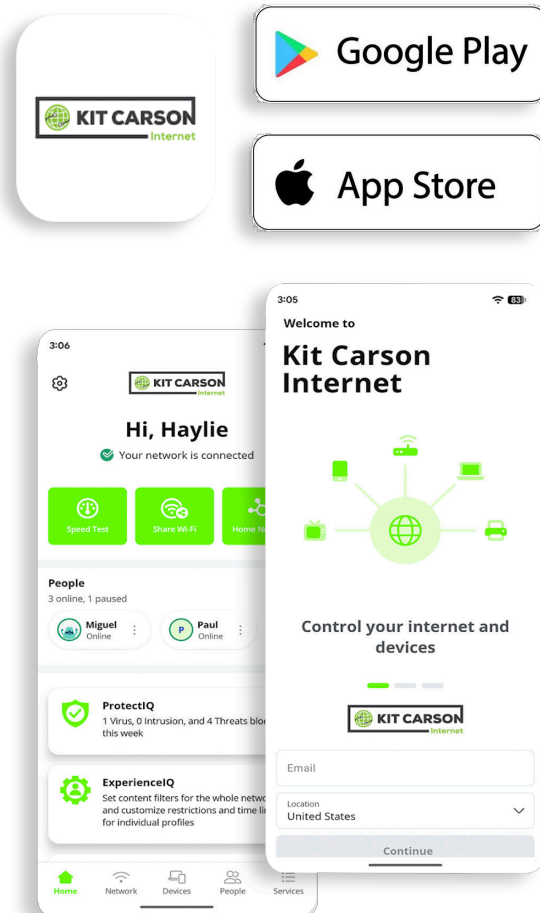

Kit Carson Internet App Introduction & Final Setup Instructions:

This app allows you to manage your home Wi-Fi network, set your Wi-Fi name/password. See attached devices, parental controls.

***Download instructions on the next page.**

1. Once you've Downloaded the App, Identify Your Router. During setup, the app will ask for your router's model number (usually **GS4220E**). If you are unsure, this information is printed on the label at the bottom of your router.

3. Create Your Account Once the router is paired, follow the prompts to create your account. **Congratulations!** From this point, you will have full access to features like device priority, guest networks, and parental controls.

Kit Carson Internet App

1. Download the App (3 ways):

- **Search:** Open the **Apple App Store** or **Google Play Store** and search for "**Kit Carson Internet.**"
- **Direct Links:**

Apple/iOS:
