

# CLEAN AIR, CLEAN WATER, CLEAN ENVIRONMENT. EVERYTHING KIT CARSON DOES ENHANCES YOUR QUALITY OF LIFE.

Our partnership with Guzman Energy has significantly reduced greenhouse gas emissions, helping to create cleaner air and protect water resources across Northern New Mexico. This collaboration supports a sustainable future for our members while preserving the region's environment for generations to come. Additionally, once completed, the Questa hydrogen and solar facility will further reduce emissions and help tackle climate change.

This is what true partnership looks like.

## Environmental Impact (2017-2026):

- 327,615 metric tons of co2 reduced
- Equivalent to:
- 76,400 gasoline-powered cars removed from the road for a full year
  - 5.4 million tree seedlings grown for 10 years
  - 37 million gallons of gasoline saved annually
  - Infrastructure: that has given us 100% daytime solar: 11 solar arrays in KCEC territory (approx. 44 MW) and 3 battery storage facilities (25 MW). We have agreements with renewable energy assets like Shallow Basket (140 MW) & Panorama Wind (50 MW).

**10 YEARS**  
OF PARTNERSHIP
